Subject: RE: I oppose Duke's latest rate hike for dirty energy

Dear Ms. Edds,

This is to acknowledge receipt of your email to the Public Service Commission of South Carolina. I am forwarding your email to our Clerk's Office for processing. Your email will become a part of Docket No. 2013-59-E and will be posted on our website under this docket.

Please let me know if you should require any additional information.

Sincerely,

Deborah Easterling
Administrative Assistant

South Carolina Public Service Commission

Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians.

Sincerely,

Wendy Edds

South Carolina Public Service Commission

Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians.

I am well aware that this area, the "Low Country" suffers from very high mercury pollution and rates very low in air quality throughout the country.

We can do MUCH better and should! Since TOO many people, exspecially children and the elderly suffer terribly from asthma and allergies.

Also some studies have shown that autism is caused by lead, mercury, arsenic and other chemicals associated with coal fired power plants!

It is UNACCEPTABLE, IMMORAL and IRRESPONSIBLE to allow the coal industry to continue to destroy mountains from mountaintop removal, fill in thousands of miles of waterways with toxic waste and pollute our air with numerous chemicals that contribute and cause climate change, cause major illnesses and even death.

With Obamas' commitment to reduce our use of fossil fuels, and the fact that climate change is real and a serious threat, we MUST invest in and encourage solar, wind, wsate to energy, biomass and other renewable, clean energy sources!!

This IS the way that WE can create manufacturing jobs here in the US and create thousands of jobs and invigorate the economy!! Renewable energy creates 3 times as many jobs as fossil fuels and is more localized.

It will help save lives and help ensure there is a clean, healthy livable planet for ALL to enjoy!
I resent having to pay electric bills from companies that are NOT GOOD stewards!
I have made a pledge that I began years ago and will keep. I do NOT turn on my AC during the summer, I
resent giving MY HARD EARNED MONEY to such greedy, filthy people and companies!

Sincerely,

Lisa Scharin

Subject: I oppose Duke's latest rate hike for dirty energy

Apr 20, 2013

South Carolina Public Service Commission

Dear Public Service Commission,

I am a resident of North Carolina who has experienced the recent rate hikes from Duke Energy. They are always asking for more, but do nothing to reinvest in CLEAN energy sources that will cost us less and pour NO pollution into the environment!

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians.

North Carolina has been deemed one of the best sites for off-shore wind energy, yet nothing is done, year after year! We need to STOP coal fired power plants and STOP adding nuclear power plants to our state. Force Duke to invest in clean energy- do not allow another rate hike until they close down OLD energy plants and invest in new and efficient, clean power!

You must force them to do this- they do not care to do it on their own despite their rhetoric!

No MORE RATE HIKES until CLEAN ENERGY is developed in North Carolina!!

Sincerely,

Anne Jones
